"JOSHING" THE DAGO.

Congress Miners Indulge in Horseplay.

They Send an Alarming Letter to the Italian Gonsul at Denver.

It begins to look now as if the Italian consul at Denver who nearly and foolishly created international consternation six weeks ago, had only anticipated impending events. Trouble does seem to be brewing at Congress, the seat of the former reported trouble. The following copy of a letter from the American miners at Congress was received by Governor Hughes from the Italian consul at Denver. It looks bloody enough but it is more probably an attempt by the Congress miners to "josh" and make a monkey of King Humbert's Denver representative:

CONGRESS MINE, June 30, 1895.
To the Honorable Italian Consul, Denver,

To the Honorable Italian Cousul, Denver, Colorado
DEAR SIR—You are hereby notified that all of your "subjects" who are not citizens of the United States by being in the country for at least five years, must leave this camp by August 1, 1895, or we will take heroic means to see that they do leave on that date.

If you value the lives of your "subjects" and have any influence over them you will give them advice to leave. They are obnoxious and working under wages by paying monthly installments to the foreman of the mine, and such things will not be tolerated any longer.

Yours respectfully.

(Signed)
P.S By giving this immediate attention you will prevent trouble.

In order to be on the safe side Gov-ernor Hughes forwarded the communication to Superintendent Gage.

HE DID NUT LIKE PERFUMES. But the Reminiscent Odor of a Cigar Was

Another Matter. It was at a lecture; the room was hot

and crowded, and Mrs. Bittersweet noticed that her husband was suffering under a sense of injury, says the Chicago Tribune. "What is it, dear?" she whispered.

under cover of one of the speaker's rounded periods.

Mr. Bittersweet's sniffs became more audible. "It's the abominable odor of perfumery in the room," he puffed. inted I can count fourteen distinct scents every time the women about us ap-

"O, well, try not to notice it," whis pered his wife, with that cheerfulness always displayed by the friends of the sufferer in such cases. "Do listen to the lecture; it is just splendid."

"Humph; I suppose you like the odor; women always do like whatever costs money. Do you happen to know what is spent annually on perfumery in America alone?

"No, dear, I don't. What is it?"

"Um-well, I don't remember the exact figures just now, but I assure you it is something enormous. For my part I think that the carrying of perfumes into public places should be prohibited by law, and the amount of money which would otherwise have wasted upon them might then go towards endowing an asylum for those idiots who don't know that others have rights in public..."
"Sh...sh! You are disturbing people.

The lady in the violet bonnet is looking daggeriat you."

"Humph, the one whose handkerchief is pointed ! with patchouli; I don't care if she isn't pleased. Say, I think I'll step out for a dignr.

"Do," sold his wife, with a smile, "I thought a cobling beside the perfume was troubling you."

He came back before long with smil-

ing face and settled himself contentedly in his place. As he did so the help in the violet bonnet, who sat next to him, began to wave her handkerehief before her face.

"Isn't it awful," she whispered to her companion, "wherever one goes it is just the same-some horrid man poisome the air with the odor of stale tobacco; positively I couldn't endure it if I hadn't some strong perfume about me as an antidete."

FEEDING MILCH COWS.

to Maintain Even Production Throughout the Seaso

One of the important items in securing the best profit from the cows is to have an even flow of milk well maintained throughout the season. On many farms there are cows that for a short season after they come in fresh yield a good flow of milk, but this soon begins to fail, especially if care is not taken in the feeding and management, and at the end of seven or eight months the quantity they give is so small that they are allowed to go dry. Many cows are kept that if charged a fair price for the food they eat would not pay for their keep.

The first important item is to have good cows. Then they must be well fed, even in summer. While during growing season the pastures can be largely relied upon; it will pay to give also a light feed of bran and corn meal, or bran and middlings. Then in order to make sure of a good supply of cheap food it will also be a good plan to plant some crop like sweet corn. fodder corn, millet, sorghum, or some thing of this kind that can be used at any time when needed. There should be a change of feed occasionally, so as to keep the cow with a good appetite, as the more good food the good dairy cow consumes the more good milk she will give. It will also be a good plan to divide the pastures so that she can be changed from one to the other at least every ten days. The cows will do much better than if they are compelled to depend upon one pasture. Besides, by changing, there will be less waste of feed. With all animals there is a natural inclination to eat the tender, sweeter growth, and in doing this, when kept in one pas-ture, there will be more or less that will grow up and mature seed. Ey dividing up the pastures and changing from one to the other, grass will all be eaten down more evenly. There should always be sweet, nutritious grasses in the pastures, so that the cows can get enough to satisfy their appetites without tramping too long or too far. The quieter and more comfortable the cows can be kept the better the results. Feed to keep the cow in a good, thrifty condition. It is not possible to make a good dairy cow fat, but good treatment will keep her in good condition. Her food will be converted into milk rather than flesh. -St. Louis Republic.

It is said that Rev. Dr. McGlynn, who lives in the pretty little rectory adjoining his church in Newburg, N Y., devotes all his leisure to the cultivation of flowers.

CULTIVATED plums, of which there are several hundred varieties, all descended from the original species, which was a native of the south Caucasian country.

At the Kew gardens a greenish glass has been used for the greenhouses for half a century. Recently experiments with ordinary white glass showed such a remarkable improvement in the plants that the green glass will be given up altogether.

Returning prosperity will make many rich, but nowhere can they make so much within a short time as by successful Speculation in Grain, Provisions and Stock

FOR EACH DOLL AR INVESTED can be made by our Systematic Plan of Speculation

Originated by us. All successful speculators operate on a regular system.

It is a wellknown fact that there are thousands of men in all parts of the United States who, by systematic trading through Chicago brokers make large amounts every year, ranging from a few thousand dollars for the man who invests a hundred or two hundred dollars up to \$50,000 to \$100,000 or more by those who invest a few thousand.

It is also a fact that those who make the largest profits from comparatively small investments on this plan are persons who live away from Chicago and invest through brokers who thoroughly understand systematic trading.

Our plan does not risk the whole amount invested on any trade, but covers both sides, so that whether the market rises or falls it brings a steady profit that piles up enormously in a
